

## Overview

Test chain storage reels are used to store roller test chains. All test chain storage reels come with a geared brake motor.

## Benefits

- Mounts to existing conveyor structure above belt
- Motorized application and retraction of test chains for calibration
- Fast and easy calibration

## Application

Milltronics calibration test chain storage reels provide motorized application and retraction of test chains. Complete with an AC motorized storage reel, test chain reels ensure safe and quick use of calibration test chains. Designed for use in environments where material tests cannot be performed, test chain storage reels are available in any belt width to meet existing customer conveyor geometry. For linearity tests dual compartment reels are available for different chain weight calibration. Test chain storage reels have a brake integral to the motor ensuring that test chains do not un-reel during power outages or material running.

### Test chain storage reel

#### Technical specifications

Milltronics Test chain storage reels	
<b>Medium conditions</b>	
Operating temperature	-10 ... +60 °C (14 ... 140 °F)
Design	<ul style="list-style-type: none"> <li>• C5-M rated polyester painted structural steel</li> <li>• 10 mm (3/8 inch) galvanized rope provided for chain spooling</li> <li>• Self-aligning pillow block bearings</li> </ul>
Reel	Up to 1 524 mm (60 inch) Chain application at 7 ... 10 RPM
Drive motor	TEFC, AC, three phase motor with shaft mounted helical bevel gear reducer
Approvals	CE, UKCA, RCM, EAC, KC

#### Dimensional drawings
