## Key features

#### Servo-pneumatic drive technology

Positioning and Soft Stop applications as an integral component of the valve terminal CPX – the modular peripheral system for decentralised automation tasks. The modular design means that valves, digital inputs and outputs, positioning modules and end-position controllers, as appropriate to the application, can be combined in almost any way on the CPX terminal.

#### Advantages:

- · Pneumatics and electrics control and positioning on one platform
- Innovative positioning technology piston rod drives, rodless drives, rotary drives
- Control via fieldbus
- Remote maintenance, remote diagnostics, web server, SMS- and e-mail alerts are all possible via TCP/IP
- Modules can be quickly exchanged and expanded without altering the wiring

#### Axis controller CPX-CMAX

#### Free choice:

Position and force control, directly actuated or selected from one of 128 configurable position sets. If you are looking for something more: the configurable record sequencing function enables simple functional sequences to be realised in the axis controller CPX-CMAX. Everything is recognisable:

auto identification detects every station with its device data on the controller CPX-CMAX.

### Also included:

Actuation of a brake or clamping unit via the proportional directional control valve VPWP is also part of the scope of performance of the controller CPX-CMAX.

Up to 8 modules (max. 8 axes) can be operated in parallel and independently of each other.

Commissioning via FCT (Festo configuration software) or via fieldbus: no programming, only configuration.

#### Advantages:

- Greater flexibility
- OEM friendly commissioning also via fieldbus
- Easy installation and fast commissioning
- Cost-effective
- You program the system in your PLC environment

# Key features

## End-position controller CPX-CMPX

Fast travel between the mechanical end stops of the cylinder, stopping gently and without impact in the end position.

Fast commissioning via control panel, fieldbus or handheld unit.

Improved standstill control. Actuation of a brake or clamping unit via the proportional directional control valve VPWP is an integral part of the controller CMPX. Depending on the fieldbus chosen, up to 9 end-position controllers can be actuated on the CPX terminal. All system data can be read and written via the fieldbus, including, for example, the mid-positions. Data sheets  $\rightarrow$  Internet: cpx-cmpx

Advantages:

- Greater flexibility
- OEM friendly commissioning also via fieldbus
- Easy installation and fast commissioning
- Cost-effective
  - Up to 30% faster cycle ratesSignificantly reduced system
- vibration
  Improved work ergonomics thanks to significantly reduced noise level
- The extended diagnostics help to reduce the service time of the machine

Data sheets  $\rightarrow$  Internet: vpwp

#### Proportional directional control valve VPWP

#### Measuring module CPX-CMIX

The 5/3-way proportional directional control valve for applications with Soft Stop and pneumatic positioning. Fully digitalised – with integrated pressure sensors, with new diagnostic functions. In sizes 4, 6, 8 and 10. Flow rates of 350, 700, 1400 and 2000 l/min. With switching output for controlling a brake.

Colour-coded supply ports. Pre-assembled cables guarantee faultless and fast connection with the controllers CPX-CMPX and CPX-CMAX. Advantages:

- Easy installation and fast commissioning
- Reduction of system downtimes thanks to the new diagnostic options
- With switching output for controlling a brake/clamping unit

#### Data sheets $\rightarrow$ Internet: cpx-cmix

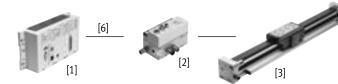

Advantages:

- All process steps can be documented, which improves quality
- An adjustable contact force (via pressure regulator) increases the precision of the "displacement sensor"
- With displacement encoders for measuring absolute values, the actual position is immediately available after the system is switched on

Fully digital data acquisition and transmission means that pneumatic cylinders can be used as sensors. With very high repetition accuracy and incorporating both analogue and digital measuring sensors. Suitable for the linear drive DGCI with displacement encoder for measuring absolute values, for the piston rod drive DNCI/DDPC with incremental displacement encoder or alternatively for a potentiometer of type MLO.

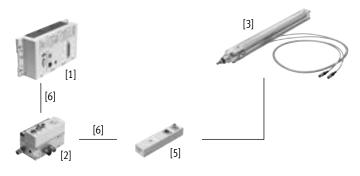

# Drive options

#### System with linear drive DDLI, DGCI

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Linear drive DDLI, DGCI with displacement encoder
- [6] Connecting cable KVI-CP-3-...

#### System with standards-based cylinder DNCI, DDPC

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Standards-based cylinder DNCI, DDPC with displacement encoder
- [5] Sensor interface CASM-S-D3-R7
- [6] Connecting cable KVI-CP-3-...

- Pneumatic rodless linear drive with displacement encoder, with or without recirculating ball bearing guide
- Displacement encoder with absolute and contactless measurement
- Diameters:
  - For DGCI: 18 ... 63 mm
  - For DDLI: 25 ... 63 mm
- Stroke: 100 ... 2000 mm in fixed lengths
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 1 ... 180 kg
- No sensor interface required

#### Data sheets → Internet: dnci

#### Advantages:

Advantages:

CPX-CMAX)

• Complete drive unit

- Compact drive unit
- Can be used universally
- Also with guide unit
- For fast and accurate positioning up to ±0.5 mm (only with axis controller CPX-CMAX)
- Standards-based cylinder with integrated displacement encoder, complies with DIN ISO 6432, VDMA 24 562, NF E 49 003.1 and Uni 10 290
- Displacement encoder with contactless and incremental measurement
- Diameter: 32 ... 100 mm
  - Stroke: 100 ... 750 mm
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 3 ... 450 kg and the corresponding sensor interface CASM-S-D3-R7
- Pre-assembled cables guarantee faultless and fast electrical connection

# Data sheets $\rightarrow$ Internet: ddli or dgci

• DDLI for easy connection to the

• Excellent running characteristics

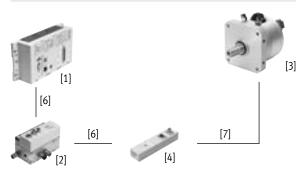

• For fast and accurate positioning up

to ±0.2 mm (only with axis controller

customer's guide system

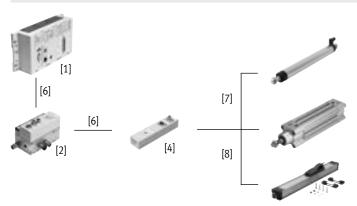

# Drive options

#### System with swivel module DSMI

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Swivel module DSMI with displacement encoder
- [4] Sensor interface CASM-S-D2-R3
- [6] Connecting cable KVI-CP-3-...
- [7] Connecting cable NEBC-P1W4-K-0.3-N-M12G5

#### System with potentiometer

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [4] Sensor interface CASM-S-D2-R3
- [6] Connecting cable KVI-CP-3-...
- [7] Connecting cable NEBC-P1W4-K-0.3-N-M12G5
- [8] Connecting cable NEBC-A1W3-K-0.4-N-M12G5

- Swivel module DSMI with integrated displacement encoder
- Identical design to pneumatic swivel module DSM
- Absolute displacement encoder based on a potentiometer
- Swivel range from 0 ... 270°
- Size: 25, 40, 63
- Max. torque: 5 ... 40 Nm
  Range of applications: Soft Stop and pneumatic positioning
- Mass moments of inertia of 15 ... 6000 kgcm<sup>2</sup> and the corresponding sensor interface CASM-S-D2-R3
- Pre-assembled cables guarantee faultless and fast connection with the proportional directional control valve VPWP
- Attachable potentiometers with absolute measurement, with high degree of protection
- With connecting rod or moment compensator
- Measuring range: Connecting rod: 100 ... 750 mm Moment compensator: 225 ... 2000 mm
- Pre-assembled cables guarantee faultless and fast connection with the sensor interface CASM
- Range of applications: Soft Stop and pneumatic positioning with cylinder diameters of 25 ... 80 mm
- Loads from 1 ... 300 kg

#### Data sheets $\rightarrow$ Internet: dsmi

#### Advantages:

- Complete drive unit, compact, can be used immediately
- High angular acceleration
- With adjustable fixed stops
- For fast and accurate positioning up to ±0.2 mm (only with axis controller CPX-CMAX)

#### Data sheets → Internet: casm

Advantages:

- Easy installation and fast commissioning
- Cost-effective
- Can also be used in harsh ambient conditions
- Variety of drives: CPX-CMPX and CPX-CMAX also support cylinders with external displacement encoder

#### General technical data

Piston diameter	Piston diameter 8		100	
Based on standard		ISO 15552		
Design		Piston		
		Piston rod		
		Profile barrel		
Mode of operation		Double-acting		
Guide <sup>1)</sup>		Guide rod with yoke, with ball bearing guide		
Protection against rotation		Square piston rod		
Mounting position		Any		
Type of mounting		Via accessories		
Cushioning		Elastic cushioning rings/pads at both ends		
Position sensing		Integrated displacement encoder		
		Via proximity sensor <sup>2)</sup>		
Measuring principle (displacement encoder)		Encoder, contactless and relative measurement		
Pneumatic connection		G3/8	G1/2	
Stroke				
DDPC <sup>3)</sup> [mm]		10 2000		
DDPCD [mm]		100 500		
Extended piston rod	[mm]	1 500		

1) Guide unit FENG-KF can be ordered via the modular product system (feature D) and is supplied attached. The maximum stroke is restricted.

2) Not included in the scope of delivery, can be ordered as an option

 Can only be used as a positioning drive without restriction in the range from 100 ... 750 mm. Note stroke reduction in combination with CPX-CMAX

#### Operating and environmental conditions

[bar]	412			
[bar]	48			
	Compressed air to ISO 8573-1:2010 [6:4:4]			
	Operation with lubricated medium not possible			
	Pressure dew point 10°C below ambient/medium temperature			
[°C]	-20+80			
	Severity level 2			
82	Severity level 2			
	To EU EMC Directive			
	1			
	[bar]			

1) Only applies to applications with the end position controller CPX-CMPX, SPC11 and axis controller CPX-CMAX

2) The proportional directional control valve VPWP, MPYE used requires these characteristic values

3) Note operating range of proximity sensors

4) For information about the area of use, see the EC declaration of conformity at: www.festo.com/sp → Certificates.

If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

5) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

T

# Data sheet

Forces [N] and impact energy [Nm]		
Piston diameter	80	100
Theoretical force at 6 bar, advancing	3016	4712
Theoretical force at 6 bar, retracting	2721	4418
Impact energy at the end positions	1.8	2.5
Permissible impact velocity: $v = \sqrt{\frac{2 \cdot E}{m_1 + m_2}}$	V E m1	
Maximum permissible mass: $m_2 = \frac{2 \cdot E}{v^2}$	$m_2 - m_1$	2 Moving payload

#### Positioning characteristics with axis controller CPX-CMAX

Piston diameter		80	100	
Stroke	[mm]	100 750		
Mounting position		Any		
Resolution	[mm]	0.01		
Repetition accuracy	[mm]	≤ ±0.5		
Minimum load, horizontal	[kg]	20	32	
Maximum load, horizontal	[kg]	300	450	
Minimum load, vertical <sup>1)</sup>	[kg]	20	32	
Maximum load, vertical <sup>1)</sup>	[kg]	100	150	
Min. travel speed	[m/s]	0.05		
Max. travel speed	[m/s]	1	0.7	
Typical positioning time, long stroke <sup>2)</sup>	[s]	0.8 8/1.02	0.9 5/1.10	
Typical positioning time, short stroke <sup>3)</sup>	[s]	0.7 7/0.95	0.8 0/1.32	
Minimum positioning stroke4)	[%]	≤ 3		
Stroke reduction <sup>5)</sup> [mm]		15		
Recommended proportional directional cont	rol valve			
For CPX-CMAX		→ Page 24		

1) Only in combination with external guide

2) At 6 bar, horizontal mounting position, DDPC-XX-500, 400 mm positioning travel at min./max. load

3) At 6 bar, horizontal mounting position, DDPC-XX-500, 200 mm positioning travel at min./max. load

4) Based on the cylinder stroke, but not more than 10 mm

5) The stroke reduction must be maintained on each side of the drive, the max. stroke for variable positioning is thus: stroke - 2x stroke reduction

#### Force control characteristics with axis controller CPX-CMAX

Piston diameter		80	100					
Stroke	[mm]	100 750	100 750					
Mounting position		Any						
Maximum controllable force <sup>1)</sup>	[N]	2710/2440	4240/3975					
Typical friction forces <sup>2)</sup>	[N]	140	160					
Repetition accuracy	[%]	< ±2						
of pressure control <sup>3)4)</sup>								

1) Advancing/retracting at 6 bar

2) These values can fluctuate greatly from cylinder to cylinder and are not guaranteed.

These friction forces must also be taken into consideration when using an external guide or when the cylinder is moving other components subject to friction

3) This value defines the repetition accuracy with which the internal differential pressure in the cylinder, which corresponds to the prescribed force setpoint value, is controlled and relates to the maximum controllable force

4) The effective force at the workpiece and its accuracy depend largely on the friction in the system as well as the repetition accuracy of the internal control system. Note that friction forces always work against the direction of movement of the piston. The following formula can be used as a rule of thumb to approximate the force F at the workpiece:

 $F = F_{setpoint} \pm F_{friction forces} \pm repetition accuracy of pressure control$ 

# Data sheet

## Positioning characteristics with Soft Stop end position controller CPX-CMPX, SPC11

Positioning characteristics with Soft Stop end position controller CPX-CMPX, SPC11										
Piston diameter		80	80 100							
Stroke	[mm]	100 500								
Mounting position		Any								
Repetition accuracy <sup>1)</sup>	[mm]	±2								
Minimum load, horizontal	[kg]	20	32							
Maximum load, horizontal	[kg]	300	450							
Minimum load, vertical <sup>2)</sup>	[kg]	20	32							
Maximum load, vertical <sup>2)</sup>	[kg]	100	150							
Travel time	[s]	→ Soft Stop engineering software	: → www.festo.com							
Recommended proportional directiona	l control valve									
For CPX-CMPX		→ Page 24	→ Page 24							
For SPC11		→ Page 24	→ Page 24							

1) One intermediate position. The accuracy in the end positions depends solely on the mechanical stability of the end stops

2) Only in combination with an external guide

#### Torques and lateral forces

Max. torque for protection against rotation:

 $\begin{array}{ll} \text{dynamic} & \leq 3 \text{ Nm} \\ \text{static} & \leq 5 \text{ Nm} \end{array}$ 

SIdIIC SIDII

An external guide unit FENG-KF is recommended with higher torque loads. The guide unit is supplied attached.

The permissible static and dynamic characteristic load values with and without attached guide

→ Internet: feng

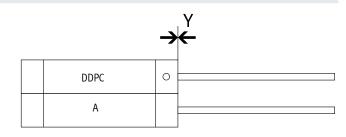

#### Mounting conditions

When mounting a drive A with magnet (for position sensing) next to a standard cylinder DDPC, the following conditions must be observed:

- X Minimum distance between the drives
- Y Offset between the drives on the bearing cap

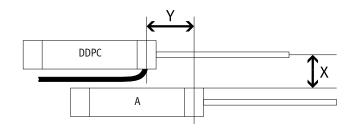

#### Parallel assembly

The drives can be mounted directly next to one another if the offset Y = 0 mm.

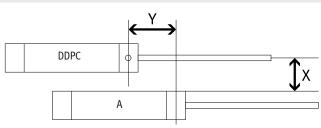

#### Offset mounting, cable outlet between the drives

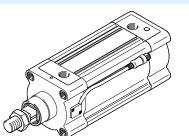

If the offset Y > 0 mm and the cable outlet is between the drives, a distance of X > 70 mm must be observed.

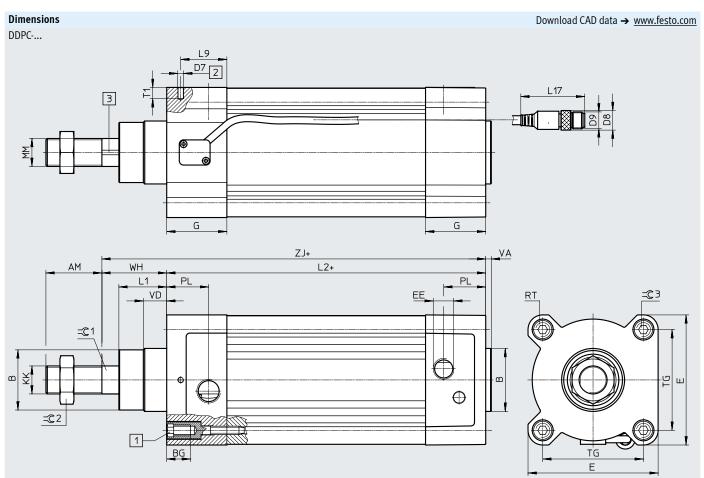

Off-set mounting, cable outlet upwards or downwards

If the offset Y > 0 mm and the cable outlet points up or down, a distance of X > 60 mm must be observed.

1) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

#### Flange mounting FNC

Material: FNC: Galvanised steel Free of copper and PTFE RoHS-compliant

#### Dimensions and ordering data MF TF UF W CRC<sup>1)</sup> Weight Forø Ε FB R ZF Part no. Туре Ø DDPC-... DDPC-...-C H13 [mm] [g] 80 174380 FNC-80 150 30 1495 93 12 16 63 126 256 351 1 100 174381 FNC-100 110 75 150 175 35 205 303 1 2041 14 16

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

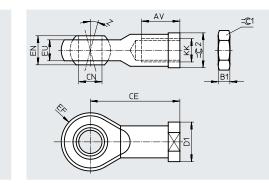

## Accessories

#### Rod eye SGS

Scope of delivery: 1 rod eye, 1 hex nut to DIN 439

Material: Galvanised steel RoHS-compliant

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions). ) In the area of the ball classified as:

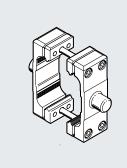

Corrosion resistance class CRC 0 to Festo standard FN 940070

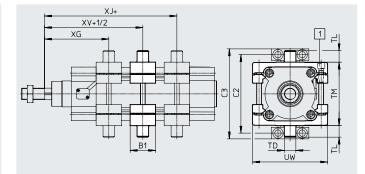

No corrosion stress. Applies to small, visually unimportant standard parts such as threaded pins, circlips and clamping sleeves which are usually only available on the market in a phosphated or burnished version (and possibly oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.

#### Trunnion flange kit DAMT

The kit can be attached at any position along the profile barrel of the cylinder.

Material: Galvanised steel Free of copper and PTFE RoHS-compliant
